DOUG JOHNSON BIO

Work gets done – for people, with people, through people™

Doug Johnson

Helping experts lead teams

The right person, in the right job, at the right time, doing the right things, and doing the right things right, for the right reason.

There are many people who have been promoted in their organisations because they are experts in their field, or they have technical skills, or they have respect from the team, or they are loyal, or they have just been around longer than anyone else. These people are the primary focus of Doug's coaching. He equips them with the skills to lead, and the tools to manage.

Over the past 35 years, observing the number of businesses and organisations that have failed because of the inability of people to lead teams, he has developed a coaching engagement methodology that addresses this reality. The focus is on the leader, but the benefit is for the whole team.

Areas of focus

Relationships, communication, productivity, understanding ourselves, leadership and influence, conflict management, personal growth and development, strategic thinking.

Doug's story

Doug started his first business in 1974. That business is still operating today. He has since started multiple businesses, and worked in the corporate and non-profit world. He studied Industrial Engineering at Wits Technikon. In all of this time he has been a student of leadership. He has been called "The team whisperer"

He is the MD of [Journey Tools Consulting](#).

He is still happily married after 45 years (to the same wife). He has 2 children, is a grandfather and a great-grandfather.
